Devices

CFO, Full-time in-person, Montreal

Position summary

We are looking for an experienced and dedicated CFO who will be responsible for planning the organization's financial strategy. The CFO will also report on metrics to optimize our growth by understanding where efficiencies exist to maximize scalability throughout the year. The CFO must be well-versed in all aspects of financial management and execution ranging from simple accounting tasks to broad investment, analyzing financial data and preparing financial reports.

Roles and responsibilities

- Prepare timely and accurate analyses, summaries and reports of financial data
- Drive the company's financial planning and structure
- Optimize/maximize timeline and burn rate to speed up product development
- Lead supplier negotiations
- Participate in fund-raising activities and negotiations
- Lead financial aspects of corporate development programs (e.g., IPO, M&A.)
- Ensure cash flow is appropriate for the organization's operations
- Prepare reliable current and forecasting reports
- Setup and ensure compliance with the law and company's policies
- Manage accounts receivable, accounts payable, payroll
- Execute non-dilutive funding strategy, manage tax returns and SR&DE returns
- Manage year-end
- Participate in human resources management

Requirements

- Proven work experience as a CFO or similar role
- Canadian and US expertise
- In depth knowledge of corporate financial law and risk management practices
- Excellent knowledge of data analysis and forecasting methods
- Ability to strategize and solve problems
- Strong leadership and organizational skills
- Excellent communication and people skills
- In-depth knowledge of financial benchmarking, accounting (IRFS and US GAAP), audit and tax compliance

Assets

- CPA is a strong advantage
- BSc/BA in Accounting, Finance or relevant field; MSc/MBA is a plus
- French verbal and written communication skills.

Puzzle Medical description

Puzzle Medical is developing a percutaneous heart pump for patients with advanced heart failure. The device's modular design allows for safe percutaneous implantation to support both renal and cardiac function through 4mm-pumps anchored in parallel in the descending aorta, allowing stability for patient mobility. To date, Puzzle Medical has successfully completed its first-in-human study with all patients experiencing improvements in cardiac and kidney function (2022); completed a Seed financing round (2021); built a strong Key Opinion Leaders committee (2021); received U.S. Food and Drug Administration (FDA) Breakthrough Device Designation (2021).
